# Geographical Coverage

# Foreword

Established in Georgia in 1994, Curatio International Foundation (CIF) is a non-governmental, not-for-profit entity, committed to improve health through better functioning health systems. CIF's work is underpinned by following core values: Hearing Needs, building on Local Strength; and Delivering Innovative Context-specific Solutions. CIF has three main strategic objectives: 1. Expand reach for a wider impact; 2. Deliver quality and creative solutions and 3. Invest in people and partnerships.

More than 20 years of field experience allowed CIF to emerge as a one of the leading think-tank and research organizations in EECA Region. Today CIF had become a provider of a high quality research and advisory services in the health sector, which is tailored to client country socio-cultural, political and economic context.

CIF is actively involved in TB related projects in the Eastern Europe and Central Asian (EECA) region.

Till recently CIF is working with the Global Fund (TGF) on Transition and Sustainability issues in countries that will be graduating from TGF funding. TB is one of the main concerns in this regard as it remains one of the most challenging Public Health issues in EECA.

CIF is actively implements research on TB, which aims to provide an in-depth understanding of the factors associated with loss in follow-up among TB patients in Georgia.

CIF implements the TB Community Systems Strengthening (TBCSS) project in Georgia, under the Round 7 Challenge Facility for Civil Society (CFCS) funded by Stop TB Partnership. The overarching goal of the TBCSS project is to build-up integrated and comprehensive responses to TB that are patient-centred, and include a strong partnership with communities and civil society. In order to achieve this goal, CIF has conducted assessment of both active and non-active local NGOs working in the TB field. CIF developed CSO directory and engagement plan and continues to work to strengthen capacity of local CSOs.

This CSO directory contains information about NGOs/CSOs in Georgia involved in the TB field. The Directory provides organizations' contact details and indicates the specific service areas/program components in which each organization has been engaged.

This directory is an initial step to build civil society network in the TB field in Georgia, and serves as an instrument for strengthening the referrals and institutional linkages within the network organizations.

For more detailed information about each CSO please visit their web-pages or contact them directly.

## Acknowledgements

CIF would like to acknowledge financial support from Stop TB partnership through the CFCS project that made it possible to conduct TB CSO mapping in Georgia and develop the service directory.

We also want to express our gratitude to Georgian stakeholders and each CSO that have devoted their time to participate in the mapping exercise, and provided information about their respective organizations.

Dr. Ketevan Chkhatrashvili  
President  
Curatio International Foundation

# Program/Service Area

- Supporting collaborative TB/HIV activities
- TB screening and referral to diagnostic centers among key affected populations: men who have sex with men sex workers, people who inject drugs
